

I am opposed to relaxing the ban that currently forbids a media company from owning both a TV station and a newspaper in the same geographic area. I live in Delaware, the second smallest state in the Union. We already have only a single major newspaper and a single public broadcasting channel serving our state. We rely on news from Philadelphia and Baltimore. I do not want to see corporate profits determine the diversity of major media sources in my own state or in the US in general. Please consider not lifting the ban.

Thank you.
